

# Oracle9i Application Server (Oracle9iAS)

## Summary of Editions and Options (Release 2) August 2002

Features / Capabilities	Standard Edition	Enterprise Edition	Options
<b>Oracle HTTP Server</b> <i>100% Apache-based. Includes plug-ins for Netscape and Microsoft IIS Web servers, Perl interpreter, and Dynamic Monitoring Service (DMS) support. Includes extensive support for Apache modular architecture, and Web server clusters for high availability.</i>	✓	✓	
<b>Oracle9iAS Containers for J2EE</b> <i>The industry's fastest, J2EE-certified Java environment. Support for Web Services including UDDI, SOAP and WSDL. Fast Start Fault Recovery Architecture ensures high availability. Includes cluster support for JSPs, Servlets and EJBs.</i>	✓	✓	
<b>Oracle9iAS TopLink (1)</b> <i>An advanced Java persistence architecture for rapid development and deployment of enterprise Java applications with relational databases.</i>	✓	✓	
<b>Oracle9iAS Portal</b> <i>Browser-based environment for building and deploying personalized e-business portals.</i>	✓	✓	
<b>Oracle9iAS Security</b> <i>Ensure end-to-end security with open, standards-based security features combined with single sign-on to reduce the cost of password management.</i>	✓	✓	
<b>Oracle Enterprise Manager</b> <i>Extensible, browser-based management and monitoring environment for application server nodes and J2EE components. Ability to easily install, configure and manage clusters.</i>	✓	✓	
<b>Oracle9iAS Unified Messaging</b> <i>Integrate e-mail, voice, and fax in one centrally managed system.</i>	✓	✓	
<b>Oracle Internet File System</b> <i>Present documents and media as files and folders that users can access through Windows, the web (HTTP), e-mail, and FTP.</i>	✓	✓	
<b>Oracle9iAS Web Cache</b> <i>Built-in Web caching to turbo-charge dynamic Web sites and Internet applications. Includes support for cache clusters for high availability.</i>		✓	
<b>Oracle9iAS Integration</b> <i>Standards-based platform and tool for integrating users, applications, Web services and partners. A suite of pre-built packaged application adapters is also available (licensed separately).</i>		✓	
<b>Oracle Internet Directory</b> <i>Manage user identities, roles, authorization and authentication credentials for LDAP-enabled applications in a single, centralized repository.</i>		✓	
<b>Oracle9iAS Clickstream Intelligence</b> <i>Measure and analyze Web site performance, visitor traffic, the effectiveness of Web content and customer loyalty.</i>		✓	
<b>Oracle9iAS Discoverer</b> <i>Create, modify, and execute ad-hoc business intelligence reports to perform sophisticated analysis using any standard Web browser.</i>		✓	
<b>Oracle9iAS Reports Services</b> <i>Enables browser-based, high fidelity enterprise reporting. Access any data, publish it in any format, anywhere.</i>		✓	
<b>Oracle9iAS Forms Services</b> <i>Optimized environment for deploying Oracle Forms Developer applications to the Internet.</i>		✓	
<b>Oracle9iAS Personalization (2)</b> <i>Using data mining technology, enables 1:1 marketing by dynamically serving real-time, personalized recommendations to both registered customers and anonymous visitors.</i>			✓
<b>Oracle9iAS Wireless (2)</b> <i>Make information in any database or application available to any portable device connected to the Internet.</i>			✓

(1) Oracle9iAS TopLink can be purchased separately.

(2) Oracle9iAS Personalization and Oracle9iAS Wireless are Options to Oracle9i Application Server Enterprise Edition.
